Service Capability

Plenty Mirrlees Pumps Engineering Services

As Pump manufacturers for over 60 years, we at Plenty Mirrlees Pumps know how important it is to our customers, that trouble free running of our equipment is guaranteed for optimum plant operation.

Through our unrivalled expertise in providing quality pumps to the various market places, a platform has been formed within our ever-expanding pump engineering service centre at Glasgow, from which we can offer the same quality and reliability to all of our serviced equipment.

Installation & Commissioning

Plenty service engineers' install and commission pumps on and offshore throughout the world.

In House Pump Refurbishment

The skill and expertise of our Engineering & Manufacturing Departments is the key to re-engineering components to the highest standard.

Mechanical and metallurgical improvements can be incorporated into the refurbishment process.

Field Service

Our UK network of engineers provide planned and comprehensive on-site service, repair and refurbishment programmes for all types of pumps, including pumps not designed and manufactured by Plenty Mirrlees Pumps.

Whether servicing takes place in the field or at our Service Centre, the same standards of excellence apply, ensuring our customers' pumps are back in the field swiftly and operating at maximum efficiency.

MARKETS

- Offshore Oil & Gas
- Defence
- Marine
- Power Generation
- Petrochemical
- General Industry

Spare Parts

Plenty service centre maintains a stock inventory of the most common wearing components.

Parts required for *Emergency* breakdown situations and non-Plenty pumps can be manufactured upon request, quickly and accurately at our comprehensive manufacturing facilities.

Performance Testing

Full string or performance tests can be carried out on existing or re-engineered equipment in Plenty's dedicated factory testing facilities.

Noise and vibration analysis can also be carried out.

Customer Commitment

Every refurbished and tested pump carries a comprehensive 12-month warranty.

All service work can be complemented with full Quality Assurance and documentation package.
